## RANGE COMPOSITION

EVO900: a range designed to guarantee the highest level of performance, reliability, energy saving, safety standards and ergonomic operation. These concepts are reflected throughout the line in its modularity, construction and numerous configurations: countertop (on base or table), free-standing, on concrete or stainless steel plinth, bridged or cantilever. Thanks to its advanced technology and premium performance, EVO900 is a perfect solution for restaurants as well as large institutions needing high power and high productivity. The models detailed in this sheet are 4 induction plate tops available in half or full module versions and with different voltages.

**EV0900** 

## **INDUCTION COOK TOPS**

ZANUSSI

## FUNCTIONAL AND CONSTRUCTION FEATURES

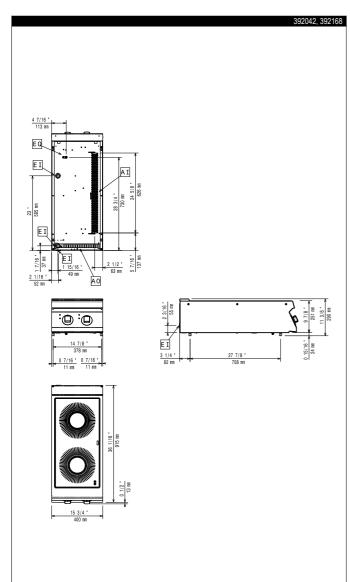

- ◆ The induction cooking top provides a powerful, fast, efficient and easy to clean solution for all cooking needs. Induction technology allows the heat to be transferred exclusively to the bottom of the pot or pan thus reducing heat dispersion to the working environment.
- ◆ Worktop in 20/10 stainless steel. Front, side and back panels in stainless steel with Scotch Brite finish.
- ◆ Ceran® glass ceramic cooking surface 6 mm thick.
- ♦ 4 independently controlled induction zones with diameter 280 mm and power 5 kw allowing very low cooking times and avoiding heating dispersions.
- ◆ Cooking zones are activated only when in direct contact with pans that are specific for induction plates. The cooking zone not in contact with a

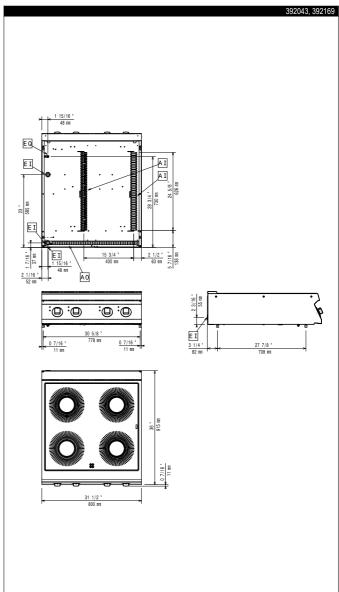

pan is not activated and remains cold

- ◆ Induction zones equipped with overheating safety device which protects the appliance from any damage that may be provoked by an overheating of the inductors (ex. when using the appliance with pots/pans that have little or no food in them).
- ◆ Digital control panel with 9 different levels of power, allowing an easy and precise cooking. Ideal for cooking delicate foods.
- ◆ All top models are provided with a service duct to facilitate installation

- and can be easily mounted on table tops, refrigerated bases, open base cupboards, bridging supports or cantilever supports.
- ◆ Main connections can be via the rear of the unit.
- ◆ Right-angled, laser cut side edges to allow for the flush-fitting of units side-by-side thus eliminating gaps and possible dirt traps.
- ◆ Access to all components from the front
- ◆ Colored leds located on control console to indicate when each zone is in function.
- ◆ IPX5 water protection.
