## RANGE COMPOSITION

EVO900: a range designed to guarantee the highest level of performance, reliability, energy saving, safety standards and ergonomic operation. These concepts are reflected throughout the line in its modularity, construction and numerous configurations: countertop (on base or table), free-standing, on concrete or stainless steel plinth, bridged or cantilever. Thanks to its advanced technology and premium performance, EVO900 is a perfect solution for restaurants as well as large institutions needing high power and high productivity. The models detailed in this sheet are 23 litres high productivity fryers in electric version.

**EV0900** 

## **ELECTRIC HIGH PRODUCTIVITY FRYERS - 23 LT**

ZANUSSI

## FUNCTIONAL AND CONSTRUCTION FEATURES

- ◆ The freestanding electronic fryer with deep drawn V-Shaped well is ideal for kitchens needing a versatile, efficient and easy to clean unit that can guarantee high quality cooking results. The V-Shaped well is equipped with high efficiency external heating elements guaranteeing a longer oil life (compared to fryers with infrared heating elements inside the well) as well as a uniform distribution of heat. The electronic programmability make this unit a must for any kitchen wanting to standardize their cooking procedures.
- ◆ Infrared heating elements easily tilted up for cleaning of the well.
- ◆ The V-Shaped well is made from two pieces of pressed stainless steel that are seamlessly welded together for maximum hygiene, safety and reliability.
- ◆ Working temperature from 110°C to 185°C.
- ◆ All models have right-angled side edges to allow flush-fitting joins between units, eliminating gaps and possible dirt traps.
- ◆ The "V" shaped well has the infrared heating elements attached to the outside allowing an increased life of the oil, greater productivity and an easier cleaning.
- Additional overheat safety thermostat.

- ◆ Worktop in 20/10 stainless steel. Front and side panels in stainless steel with Scotch Brite finish.
- ♦ Oil drainage via a tap into a drainage container positioned under the well thus simplifying the consumed oil management and guaranteeing the operator safety.
- ◆ Digital control (push button function): cooking temperature set; cooking time set; main switch; set actual temperature switch; store cooking program.
- ◆ The melting function allows to safely heat-up solid shortening which is used to fry products.
